背景

With its three years of experience, the city of Saint-Jean-de-Braye welcomes you for a fourth year of work. The local community, the inhabitants and the elected officials will welcome you warmly and will guide you through their territory: The Parc des Longues Allees and its summer guinguette which programs concerts, the walks on the banks of the Loire, the tyrolienne... Meetings with the young people of the sociocultural association of the city will be organized, a treasure hunt and an intercultural meal will be eventually organized!

活動内容

Take part in a workcamp between city and nature, by participating in the construction of a pergola and wooden furniture in the city of Saint-Jean-de-Braye, east of the Orleans Metropolis. Located in the heart of France and at the gates of the castles of the Loire, World Heritage of Unesco, this workcamp will take place near the bike path "la Loire a velo" frequented by cyclists from all over the world, who descend from the mountains of the Massif Central to the Ocean.

For this fourth consecutive project, you will build a pergola with benches and wooden chairs that will be installed in a green space located in front of the Jacques Monod high school. Carried out at the request of the inhabitants, your work will allow the creation of a relaxing space and a garden in the heart of the city, giving meaning to an unexploited place, which the high school students and walkers will appropriate and in which they will be able to recharge their batteries.

You will have the opportunity to meet and exchange with volunteers from other workcamps organized in the Orleans Metropolis, and to discover the cultural life of the Loire Valley.
